

Centriline[®] CPN Flat Cable

Overview

Description

Centriline[®] CPN flat is a cost effective polypropylene insulated cable.

Components

- 1 - Armor: Galvanized steel
- 2 - Jacket: Oil resistant, patented flexible Nitrile
- 3 - Insulation: High dielectric polypropylene
- 4 - Conductor: Solid tinned copper

Features and Benefits

- **Standard service:** Operating temperature of -30°F (34°C) to 205°F (96°C)
- **High dielectric electrical grade polypropylene insulation:** Formulated for down-hole applications
- **Nitrile rubber jacket:** Adds physical protection and reduces the possibility of damage due to gas, heat or pressure
- **Galvanized steel armor:** Overall protection
- **Special edge coated armor:** Edge coated on all four sides, providing the best in corrosion protection
- **Flat configuration:** For wells with marginal clearance
